

STREAM in Kyrgyzstan

Acted is an INGO working across 43 countries globally in pursuit of its triple mandate as a humanitarian, development, and environmental actor in response to the triple planetary crisis. Since 1999, Acted Kyrgyzstan works on strengthening civil society and good governance, gender equality, green economy, natural resource management and climate change adaptation, disaster risk management and emergency response.

STREAM aims to foster **evidence-based and effective Natural Resources Management (NRM)** in the Ferghana Valley. The initiative empowers local and national actors and promotes **dialogue** to ensure **sustainable development** in the context of **climate change**.

Initial watersheds / target areas:

Kozubaglan, Ak Suu & Isfayramsay

National Partners: River Basin Organisation Kara-darya Amu-darya Syr-darya under the Water Services of the Ministry for Agriculture of the Kyrgyz Republic

Key stakeholders: Local government and water authorities (village to national level), River Basin Organisations, Water User Associations, Pasture Committees, CSOs working on NRM, and end users

Timeframe: August 2022 – May 2026

Pillar I: Evidence-based planning

Targeted watershed level context, NRM and **climate change analysis, stakeholder mobilisation** and road map development with local actors and national governments.

Pillar II: Climate smart NRM practices

Provision of **capacity building** training, **technical expertise** and supports (secondment, equipment, etc.) and **small grant schemes** for stakeholders.

Pillar III: Infrastructure and dialogue

Focused investment in **infrastructure rehabilitation** and accompanying **water accounting systems** and information management approaches to facilitate **regional dialogue**.
